POSTGRADUATE DIPLOMA IN DERMATOLOGY FOR PRIMARY CARE PHYSICIANS (2019/2020)

Information Leaflet

The Post Graduate Diploma Course in Dermatology for Primary Care Physicians 2019/2020

This is a distant learning course. There will be 3 Modular Clinical workshop.

Candidates will be provided with instructive module texts which will teach them to understand dermatology beginning from the fundamentals, to the art, real time practice and its concepts.

Objectives

To provide the physicians with a structured educational experience in dermatology with an opportunity to acquire:

The skills necessary for the diagnosis and treatment of common conditions involving the skin and accessory structures.

Workshop and Seminars

1. To provide diagnostic skills to be able to perform biopsy's skin culture, skin scrapping, use mechanical device i.e. woods lamp electro surgery, microdermabrasion.
2. To elaborate on the rationale behind the science and arts of various non invasive procedures i.e. chemical peels, lasers etc.
3. Another uniqueness of this course is that of sharing practical skills to demonstrate how to blend traditional dermatology with procedures in aesthetic medicine.
4. Throughout the course trainees will be taught to enhance their therapeutic skills in topical and systemic dermatological practice.
5. Emphasis will be given on how to incorporate surgical skills in primary care practice by training workshops in procedures like, electro surgery, punch biopsy, excision of minor skin lesions, administration of intralesional steroids incision and drainage.
6. Additional training in aesthetic medicine will be provided, which will include introduction to intra dermotherapy lipolysis, management of melasma, acne therapy and cosmeceuticals.

Module 1

(MCQ') will be provided for open book testing

1. Microanatomy and functions of the skin
2. Principles of diagnosis of the skin
3. Common bacterial, viral mycobacteria, leprosy and fungal infection of the skin
4. Principles of dermatological therapy and common investigative procedures in skin management
5. Introduction to aesthetic medicine
6. Slide quiz assessment

Module II

(MCQ') will be provided for open book testing

1. Contact dermatitis, eczemas, photodermatoses and urticaria
2. Dermatoses of pregnancy, introduction to paediatric and geriatric dermatology
3. Cosmetic dermatology, lasers & light chemical peels
4. Advances in aesthetic medicine anti-aging vs Aesthetic med and Botulotoxin
5. Slide quiz assessment

Module III

(MCQ') will be provided for open book testing

1. Hair, nails pigmentary disorders
2. Introduction to dermatological surgery & hands on workshop
3. Rejuvenation of the skin Neutraceutical, hormones of the skin
4. Genital dermatoses, STD & HIV
5. Cutaneous manifestations of autoimmune diseases, systemic disorders
6. Final exam with slide quiz and viva

What does the trainee achieve at the end of the programme

- A. Towards the end of this course the physician will be able to understand normal anatomy, develop mental physiology, congenital, acquired and aging factors of the skin.
- B. Family implication of dermatological disease patients education.
- C. Compliance, diagnostic guideline, therapeutic consideration and systemic evaluation.

Without Prejudice

It is needless to say that many of our graduates have proceeded to Singapore and Wales to complete their diploma in primary care or practical dermatology with success. Any of our past candidates can attest to the high quality of this programme. It is with great pride that we can say that most of our former trainees are practicing successfully as primary care physicians with special interest in dermatology and much appreciated by their patients.

The Future for our graduates

We are happy to announce that successful candidates of this course will be able to participate in a conjoint programme of Advance Clinical Dermatology in Primary Care at the Institute of Dermatology Bangkok which is run by the MOH of Thailand and have very high standards and can be considered as among the best in Asia. The course in Thailand is for four weeks. On completion of the training the candidates will be required to take an exit examination and those who pass the IOD exam for the "Advanced Certificate in Primary Care Clinical Dermatology" will be awarded the certificate for the same. Entry into the IOD Course in Clinical Dermatology will be at the discretion of the Institute of Dermatology, Bangkok in conjunction with the Faculty of Dermatology AFPM. Those who obtain both the Postgraduate Certificate in Primary Care Dermatology and the IOD Advanced certificate will be eligible to receive the Diploma in Primary Care Dermatology from Academy of Family Physicians of Malaysia with collaboration of the Institute of Dermatology, Bangkok. Thus far about 235 candidates have successfully participated in the same.

Workshop 1 – 30th November, 1 & 2 December 2019

Workshop 2 – April 2020

Workshop 3 & VIVA – July 2020

* The dates are subject to changes at the discretion of Course Director
